

EDUCATION AND TRAINING

She graduated in 2002 from Department of rubber and plastics at Faculty of chemical and food technology at the Slovak Technical University in Bratislava.

2002 - 2006

Ph.D. in Macromolecular Chemistry from Polymer Institute, Bratislava (Dr. I. Lacík)

POSITIONS

since 2006

Research Scientist, Department of Special Polymers and Biopolymers, Polymer Institute, Bratislava

WORK INTERESTS

Microencapsulation, capsule formation based on polyelectrolyte complexation, polyelectrolytes, (inverse) size exclusion chromatography, viscometry, light scattering, design of experiment, collaboration with the biotechnology, biomedicine partners and laser-center for the specific techniques (AFM, SNOM).
